CSMN Wifi: iPhone/iPad/iPod Configuration Advice

The following information details how to setup iPhone/iPad/iPod devices for connection to the “CSMN” Cisco enterprise wireless networks.

1. Tap the “Settings” icon:

2. Tap “Wi-Fi”:

3. Ensure “Wi-Fi” is turned on, then tap “CSMN”:

4. Enter your network username and password and tap ‘Login’:

5. Press the ‘Home’ button to return to the main screen.

6. Install the zScaler SSL certificate by entering the following address in Safari:

   http://mnconnect.cloud/zscaler

   Click ‘Install’, accept the warning and enter your ‘passcode’ if required then click ‘Done’:

   ![Zscaler Root CA](Zscaler Root CA)

   ![Install](Install)

   You will now be connected to the wireless network. Internet access will now be available from the device.

   To log out, visit http://mnconnect.cloud and click ‘Logout’

   *Note: zScaler SSL certificate install steps only need to be done once when initially connecting the device to the CSMN wireless network.*
